1

Recognize the symptoms.

A cataract is a clouding of the natural lens inside the eye.

Symptoms can include:

- Decreasing vision with age
- Blurred or double vision
- Seeing halos around bright lights
- Difficulty seeing at night
- Vision that worsens in sunlight
- Difficulty distinguishing colors
- Poor depth perception
- Frequent prescription changes
- Difficulty reading

Vision through a cataract

Normal vision

2

Schedule a comprehensive eye exam, including a cataract screening.

To make an appointment with Drs. Campbell, Cunningham, Taylor & Haun: **Call (865) 584-0905.**

3

Ask about the latest cataract treatment options.

Drs. Campbell, Cunningham, Taylor & Haun customize your cataract surgery to fit your specific vision needs and lifestyle. They will discuss all the options available and recommend the treatment path that's best for you.

Cataract treatment options include:

- **Monofocal Lens Implants** which are designed to improve distance vision. Reading glasses may be needed for close or intermediate vision.
- **Advanced Lifestyle Lenses** are designed to improve vision at all distances (including reading!) and help patients reduce or possibly eliminate dependence on glasses or contacts. Lifestyle Lens options include Crystalens®, ReSTOR®, Tecnis® and Toric® lens implants.
